

YAHYA NASHAR

FULL STACK ENGINEER

PROFESSIONAL SUMMARY

I am a committed and innovative full stack engineer, I thrive to create new applications, whether it is on the web, desktop, or cross platform mobile devices. I am not a "Frameworker", I am a "Developer", hence you will find that I utilize many different technologies to build my applications and I am not tied to a single framework. I always like to learn new technologies, and discover other ways to create different systems and programs.
